MS in Analytics Modular Curriculum (33 credit hours)

KSB 620 & 621 Capstone Experience Practicum (2 x 1.5 cr)

Functional Specialization (12 cr)

Business Administration

Bio & Computational Statistics

Marketing

IT Consulting

Data Science

Accounting Forensics

Accounting Analytics

Financial Quantitative Analysis

Advanced Analytics

Analytics Core (9 cr)

ITEC 610
Managerial Statistics

ITEC 620 Business Insights Through Analytics

ITEC 621
Predictive Analytics

ITEC 616
Managing the Digital Organization

ITEC 670
Database & Big Data

ITEC 660
Business Intelligence

Tools:
KSB 999 R;
ITEC 600 Python

Required (red outline) and electives (blue outline) for Analytics Certificate 12 cr.

Learning Objectives

To give students the knowledge and skills to: (1) formulate an organizational problem; (2) identify the data necessary to analyze the problem; (3) select the most appropriate methods and tools to conduct the analysis; and (4) make data driven decisions based on the results of this analysis. The program was designed to provide a framework in which students are not only trained on quantitative and analytical skills, but also on a functional domain of specialization to enhance the students' ability to better understand how to conduct analysis in that domain.

MS in Analytics – Curriculum Overview (33 credit hours)

Capstone Experience

KSB 620 & 621 Analytics Practicums – 3 credits (2 x 1.5 credits each semester)

Analytics Core – 9 credits (must be completed in 1st. year)
